company
profile

company introduction

Daou Lighting is a global-oriented company that specialized in innovative functional outdoor lighting products and solutions, founded in 2009, based in Zhejiang China.

Our focus is never large-scale production, but the capacity to create new ideas, implement the communication between concepts and realities. With our dedication to the perfect manufacturing process, our understanding for light and shadow, and our minimalist products, we have been working with designers and lighting architects to create a number of interactive and iconic projects.

We use artistic thinking and attitude to narrate, redefine the relationship between people and the environment with light, and awaken the spirit of architecture. From development to research, to design and assembly, our products leave here for projects all over the world.

Innovative and functional lighting solutions

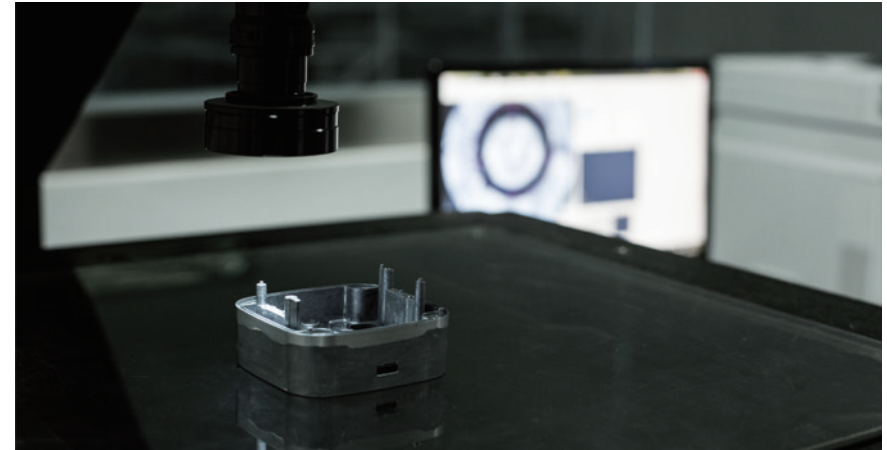

- Over 13 years of know-how
- Durable products, attention to details and focus on design
- Continuous technological research
- Bespoke service dedicated to every client
- Controlled working environment

continuous development

The technical, research and development departments have always been capable of renewing and innovating to response the technological revolutions in the lighting engineering field and to meet the needs of an ever-changing market, creating new and unique concept and lighting products.

We are doing our best to exploit the market, and bringing advanced lighting concept to more people. In-depth, highly specialised technical and design expertise, together with a great passion for the lighting industry and a long-standing tradition of excellent, make us a professional partner.

bespoke service

We offer a bespoke service dedicated to each customer, we try to take care of all the needs that our clients may have to design the right light. We provide all the light elements necessary to properly illuminate an environment allowing you to have a single partner for all your exterior lighting needs.

We love nothing more than taking your bespoke lighting idea from an initial conversation through to lighting reality, during our initial consultation, you can share with us the basics of what you're looking for, such as the desired shape, lighting function, light output, and dimensions. From there, our team of expert designers and engineers will work closely with you to bring your vision to life.

Our bespoke lighting solutions are not only tailored to your technical needs but also to your aesthetic preferences. We understand that lighting is an integral part of any design project, and we take great pride in creating unique and functional products that complement and enhance outdoor spaces.

made in quality

We understand outdoor lighting projects are not transient, but long-term commitments, so all of our products go through with durable raw materials and accurate testing process to verify their compliance with existing regulations and adherence to the highest standards of quality.

Also outdoor LED luminaires are able to meet both the aesthetic and technical requirements of any projects thanks to elegant and functional design. In-house we have all the skills needed to meet the demands of the different markets.

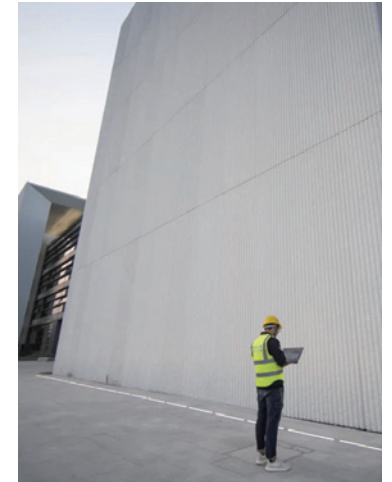

product range

Architectural lighting

- floodlights & spotlights
- wallwashers, linear systems
- inground luminaires
- surface mounted luminaires
- underwater luminaires

Technical lighting

- street & roadway lights

- high mast floodlights

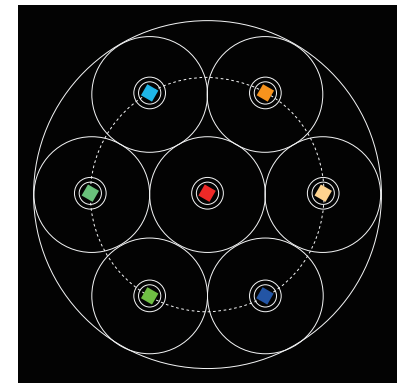

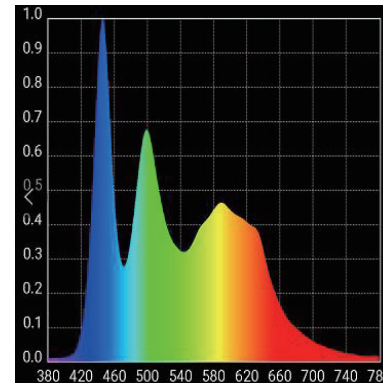

colour technology

Light is used to highlight architectural details and enhance the structures and buildings in an inspirational way, right illumination turns the architectures into real landmarks. Light colour like a magic brush that lighting designers can use to create amazing effects on facades of buildings, different light colours provide buildings an unique apperance of their own at night.

Our innovative 7-in-1 LED technology allows for producing more light colours, it improves the illumination uniformity on facade lighting. Red, PC Amber, Green, Lime, Cyan, Royal Blue, White, 7 colours are used. It is ideal for outdoor lighting design required higher colour consistency and light mixing accuracy.
